

Lesson 16: Ask an Ostrich

Do together.

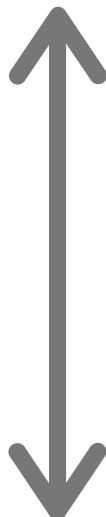

Ask, "how many ways can you move your neck?" Explain that ostriches have long flexible necks that can turn in any direction. Discuss how we use our necks to help answer yes/no questions by nodding and shaking.

Ask several yes/no questions and encourage children to nod their heads for yes and shake their heads for no. Example: Do you like birds.

If desired, invite children to ask others yes/no questions.

Shake head "no"
side to side

Nod head "yes"
up and down
