

5.2 USES HANDS TO ACCOMPLISH SIMPLE TASKS

17.2 INVESTIGATES OWN BODY IN SPACE

SUPPLIES

- CD, track 10
- Scarf

Flap Your Wings

What are different ways the child moves her arms?

Young Infant

While the child is on her back, play the song.

READY?

Help the child find fingers. How does she gaze and study her hands? Offer your finger for her to grasp. While she squeezes your finger, gently move her arm up and down.

Older Infant

Invite the child to sit across from you on the floor.

READY?

Play the song and reach your arms out to the side. Observe how the child mimics you. Demonstrate different ways to lift one or two arms. Continue to play and explore arm movements throughout the song.

Young Toddler

Give the child a scarf to hold and play the song.

READY?

Demonstrate how to move the scarf up and down with small movements and then with big movements. Explore sitting, squatting and standing while moving arms. In which position does the child have the most control?

Lesson 16
